EDUCATION

Indian Institute of Technology, Madras
B.Tech in Chemical Engineering | CGPA: 9.01/10

Chennai, India
Nov 2022 – May 2026

PROFESSIONAL EXPERIENCE

Eagle Eye Networks

AI Engineering Intern

Bengaluru, India

Jun 2026 – Present

- Optimizing Elasticsearch multi-vector retrieval pipelines, reducing query latency by over 40% across the backend.
- Fine-tuning VLMs to extract metadata and spatial context from CCTV images for semantic search and ranking.
- Developing cross-modal rank fusion strategies alongside a custom golden dataset to benchmark retrieval accuracy.

Blue Ocean

AI Architect

Remote

Apr 2026 – Present

- Designing a multi-agent system comprising 4 agents for due diligence, landscape mapping & competitor analysis.
- Building an automated VC research ecosystem via n8n flows driving asynchronous execution & dynamic routing.
- Implementing self-correcting validation loops and hallucination mitigation guided by human-in-the-loop feedback.

Hypergro

GenAI Intern

Remote

Jan 2026 – Mar 2026

- Engineered a LatentSync GenAI pipeline for hyper-personalization of ads by lip-syncing names to base footage.
- Integrated GFPGAN for advanced facial restoration, resolving artifacts to guarantee broadcast-level visual clarity.
- Optimized ML preprocessing and inference architectures, driving a 30% improvement in speed & sync accuracy.

Danone

AI Operations Intern

Hybrid

May 2025 – Nov 2025

- Architected a Neo4j GraphRAG framework via semantic extraction from SOPs, boosting query resolution by 60%.
- Fine-tuned LLMs using LoRA adapters on constrained hardware, enabling local deployment and experimentation.
- Reduced false rejection rates by 80% and accelerated QC data analysis by 40% via automated reporting pipelines.

HIGH-IMPACT PROJECTS

Edge AI Speech-to-Graph Engine | *Knowledge Graphs, Whisper.cpp, TinyLlama*

Ongoing

- Architecting an offline Android app using whisper via JNI for local transcription, summarization & KG creation.
- Engineering entity timeline visualizations via a compose canvas, powered by clean architecture, MVVM & Hilt DI.

Project Kai | *Local Orchestration, MLX, Tailscale*

Ongoing

- Engineered an agentic orchestrator over a Tailscale mesh, translating voice commands into workflows across apps.
- Developed a mem-orchestration layer for MLX to manage model loading & execution under memory constraints.

Bachelor of Technology Project | *PySR, Symbolic Regression*

Jul 2025 – May 2026

- Applied Symbolic Regression via PySR to model pressure drops in packed beds using 200+ simulation datasets.
- Derived interpretable pressure-drop correlations with predictive performance equivalent to empirical models.

Automated GenAI Content Engine | *Multi-Agent Systems, LLMs, TTS*

Jul 2025 – Nov 2025

- Automated an end-to-end pipeline producing 15 videos daily using local LLMs, TTS & dynamic video assembly.
- Engineered a multi-agent system to test multiple content strategies reducing content production time by over 90%.

ChemGPT | *GraphRAG, Ontology Extraction*

Jul 2025 – Nov 2025

- Engineered an agentic GraphRAG system using iterative hypergraph reasoning to achieve 92% retrieval accuracy.
- Built a scalable ontology extraction system maintaining 88% precision across five scientific knowledge domains.

TECHNICAL SKILLS

Languages & Tools: Python, C++, Go, Bash, SQL, Git, Docker, AWS, Azure, Databricks, Tailscale

AI/ML & Libraries: PyTorch, TensorFlow, MLX, LangChain, OpenCV, Scikit-Learn, Pandas, Whisper.cpp, PySR

RELEVANT COURSEWORK

Machine Learning, Deep Learning, Data Structures & Algorithms, Probability & Statistics, Applied Linear Algebra, Optimization Techniques, Process Dynamics & Control, Numerical Methods
